

Far Field
(fixed wall)

Quiescent fluid

Cylinder
(oscillating wall)

$$x_c(t) = -A \sin(\omega t)$$

$$D = 10 \text{ mm}$$

$$A \quad A$$

$$A = 7.958 \text{ mm}$$

$$2R_\infty = 120 D \text{ (full domain)}$$

(near field shown exaggerated, not to scale)
